---

## Professional Summary

Computer Science student in the final semester at Yarmouk University and Software Engineering Student at 42 Irbid. Hands-on experience developing software projects in C, Python, Java, and modern web technologies through project-based learning and collaborative environments. Strong interest in software engineering, problem-solving, algorithms, systems, and practical software development. Seeking internship opportunities and entry-level experiences in Computer Science and Software Engineering.

## Education

### Yarmouk University

#### Bachelor's Degree in Computer Science

Currently in final semester — Expected Graduation: January 2027

### 42 Irbid

#### Software Engineering Student

Project-based software engineering education focused on practical programming, problem-solving, peer-to-peer learning, and collaborative development.

## Technical Skills

**Programming:** C, Python, Java

**Web:** React, Vite, JavaScript, HTML, CSS, Tailwind CSS

**Mobile:** Android Development, Java, RecyclerView, SQLite, Firebase, SharedPreferences

**Databases & Backend:** SQLite, Firebase Authentication, Cloud Firestore

**Tools:** Git, GitHub, Linux, Fedora, VS Code

**Computer Science:** Algorithms, Data Structures, Problem Solving, Graphs, Trees, Pointers, Linked Lists

## Selected Projects

### **Rydora — Smart Shuttle Coordination Platform**

React, Vite, Firebase Authentication, Cloud Firestore, Tailwind CSS, Leaflet

A web-based platform focused on improving shuttle coordination for the 42 Irbid community.

### **Pac-Man**

Python, Pygame

Game mechanics project involving player movement, scoring systems, ghost behavior, debugging, and interactive gameplay.

### **push\_swap — 42 Project**

C

Algorithmic sorting project using constrained stack operations, memory management, and performance optimization.

### **Inception — 42 Project**

Linux, Docker, Containers

Systems and infrastructure project involving containerized services and Linux-based environments.

### **A-Maze-ing — 42 Project**

Algorithmic problem-solving project focused on maze representation and implementation.

## Certification

### **NVIDIA — Fundamentals of Deep Learning**

Certificate covering fundamental concepts and techniques in Deep Learning.

## Additional Information

Computer Science student with expected graduation in January 2027. Software Engineering Student at 42 Irbid. Interested in internship opportunities, Software Engineering, general Computer Science roles, and opportunities within the 42 ecosystem.
